

MAXIM HEALTHCARE SERVICES

Health Assessment Solutions

A Health Risk Assessment (HRA) can provide meaningful and useful information for the prevention of illness, identification of risk factors for preventable chronic conditions, improvement of health outcomes and reduction of healthcare-related costs.

Whether your membership consists of Commercial, Medicare Advantage, Medicaid, Exchange, or some combination of these populations, our Health Assessment Solution begins with the delivery of a proprietary, web-based Health Risk Assessment. This HRA evaluates clients from four perspectives affecting health: medical conditions, psychological factors, functional status and social determinants. Our technology takes the results of the HRA to immediately produce an individualized Care Plan for each member. This Care Plan provides an overview of concerning health factors and recommendations for interventions related to each factor.

This HRA can be conducted by clients online, via a telephone encounter with a Community Health Worker (CHW) or Registered Nurse (RN), or during an in-home visit with a CHW, RN, Licensed Practical Nurse/Licensed Vocational Nurse (LPN/LVN) or Nurse Practitioner (NP).

In addition to the HRA and Care Plan, we offer a suite of additional assessments performed in the home by an NP that can help you reach those members that have a difficult time getting to their PCP for these annual wellness encounters. These services include:

- Home and Community-Based Assessments
- Annual Wellness Visits
- Well-Child Visits
- Adolescent Well-Care Visits
- Functional/DME Assessments

About Us

As a national provider of a comprehensive suite of services, we have been making a difference in the lives of our employees, caregivers and patients for 30 years. We offer services including home healthcare, behavioral care, healthcare staffing, personal caregiving, and population health and wellness. Our commitment to customer service, compassionate patient care, and staffing experienced healthcare professionals has made us an established resource in the healthcare industry.
